Задача: Разработать программу, которая меняет на обратный порядок следования символов каждого слова в ASCII-строке символов. Порядок слов остается неизменным. Слова состоят только из букв.

Разделителями слов являются все прочие символы.

Код на С:

```
#include <stdio.h>
void flip_words (char str[]){
  int cursor = -1;
  for (int i = 0; i < 1000; i++) {
     if(str[i]>=65 && str[i]<=90 || str[i]>=97 && str[i]<=122){
        if (cursor == -1){
           cursor = i;
        }
     }
     else {
        if (cursor != -1){
           for(int j = 0; j \le (i-cursor-1)/2; j++){
              char temp;
              temp = str[cursor + j];
              str[cursor + j] = str[i-1-j];
              str[i-1-j] = temp;
           }
           cursor = -1;
        }
     }
  if (cursor != -1){
     for(int i = 0; i < (1000 - cursor -1)/2; i++){
        char temp;
        temp = str[cursor + i];
        str[cursor + i] = str[1000-1-i];
        str[1000-1-i] = temp;
     }
  }
}
int main()
  char str[1000];
  fgets(str, 1000, stdin);
  flip_words(str);
  puts(str);
  return 0;
}
```

```
